

Project Summary:

Project Type: Co Generation Location: Baskinridge, NJ
 Buildings: 1-8

Fellowship Village

Overview:

TVER also works with other companies to incorporate state-of-the-art technologies that could help bring about more energy savings. For Fellowship Village one of our solutions was Co-generation which is an application used for heating, cooling and generating local electricity.

Picture from: <http://www.aegisenergyservices.com/combined-heat-power-cogeneration>

Co-Gen Summary:

Simple Payback	6.8 years
Total Combined Savings	\$2,700,000
Utility reduction (yearly)	\$180,000
Return on Investment	15%

Co-Generators are:

- Reliable
- Highly efficient
- Environmentally sound
- Quiet
- Easy to install
